

GUIDELINES FOR PUBLICATION OF ARTICLES ON INDUSTRIAL DATA

1. INDUSTRIAL DATA is the College of Industrial Engineering Journal at the Universidad Nacional Mayor de San Marcos, publishes original and unpublished research in the field of industrial engineering and related areas.

It is published by the Research Institute of the College of Industrial Engineering; and appears as an annual volume consists of two numbers every six months.

It is indexed by REDALYC (www.redalyc.org),

LATINDEX (www.latindex.org).

The ISSN Journal of the printed version is 1560-9146 and the electronic ISSN code is 1810-9993. Since obtaining these ISSN codes, research sent us are perfectly defined for researchers, scholars or anyone can quote them so tight, always respecting their authorship.

2. INDUSTRIAL DATA Journal receives articles of unpublished papers, by researchers or abroad. Articles may be submitted in Spanish or English language.
3. The journal has the following sections:
 - a) Research.
 - b) Scientific Notes. Contains unpublished papers or reports of interest to the scientific community.
 - c) Briefing notes. With information considered relevant.
4. Research articles and structured in the following rules:

- a. **Title.** You must have the fewest possible words and express the actual content of the research.

- b. **Author (s).** It must put the first name, father's last name and mother's last name of (the) author (s). In a footnote (footnote) is placed the author's academic degree, the author's position in the institution where the author work and author's e-mail. It should be considered in the first instance the researcher to more intellectual work devoted to the study, and so on with other authors. It will be accepted up to three authors per article.
 - c. **Abstract.** It must be submitted in one paragraph and no more than 150 words (or 7 rows). It should contain clearly the problem, the procedures and results of the investigation. This synthesis will be in Spanish and English, including the title of the article.

In a separate point should add 3 to 5 keywords (Spanish and English) or less, to facilitate their inclusion in indexes and bibliographic databases. These words will be in Spanish and English.

- d. **Introduction.** It must show "why it chose the topic and why it is important." We suggest including: bibliographic history, purpose, justification and limitations of the study

- e. **Body of the article.** It must describe in clear, concise and direct how the work was performed research and includes the results supplemented by tables and figures. In regard to the pictures should be presented in three steaks, with the caption at the top. Where possible, we must interpret and discuss concretely the most important results.

For a better appreciation and because the magazine is published in black and white figures should not be sent in color. The term table includes tables, lists, catalogs, inventories, diagrams. The term figure includes photographs, drawings, diagrams, graphs, drawings, illustrations, drawings, layouts, images, maps.

You must use the International System of Units (SI).

In numbers, the comma is used only to separate the integer part of the decimal part. To facilitate reading, the numbers can be divided into groups of three digits (from the coma, if any) these groups are not separated by dots or commas. The separation into groups is not used for four-digit numbers that designate a year.

- f. **Conclusions.** It should read as contributions to the research of a problem (institutional, local, regional, national and / or international). The section may also be called "Conclusions and Recommendations".

- g. **Acknowledgments,** (Optional)

- h. **References.** Should appear in alphabetical order and join the text by the respective appointments.

h-1. If a magazine:

The name of (the) author(s), followed by the initial of your (s) name(s), year of publication (in parentheses) and the journal title, journal name abbreviated, volume, number and pages where the article appears. Example:

Poma, J., Taylor, R., Ruiz, E. (2007). Design of a virtual station for control of disturbances affecting temperature industrial processes. *Industrial Data*. Vol 7, N.º 1: 33 - 41.

h-2 Case of a book:

The name of (the) author(s), followed by the initial of your(s) name(s), year of publication (in parentheses) and book title, edition, publisher and country. Example:

Ruiz, E. (1999). *C.1ra Language Course*. Ed, Edit. UNMSM Faculty of Industrial Engineering, Lima, Peru.

h-3 Case of items for an event:

The name of (the) author(s), followed by the initial of your (s) name(s), year of publication (in parentheses), title of publication, name of event where the work was published. Example: Chavez, J (2007). Knowledge management. Paper prepared for the Workshop on Knowledge Management, Faculty of Industrial Engineering, Universidad Nacional Mayor de San Marcos, Peru.

h-4 Case of an Internet site:

The name of (the) author (s), followed by the initial of your (s) name(s), year of publication, title of publication (in brackets) website which contains the item and date of visit. Montenegro, J. (2007). Hough-transform based algorithm for the automatic invariant recognition of metallic corner-fasteners. redalyc.uaemex.mx / REDALYC / src / home / OtrArtAut.jsp?CveArt = 81690110 - 4k (Accessed on 02-01-2008)

5. Articles should be written in third person, single-spaced, on A4 size and with a maximum of 10 pages. The article should be submitted using the processor MS Word, Arial 10 points.
6. When using for the first time an acronym or abbreviation in drafting the article body will offer its complete equivalence, and then in parentheses the acronym or abbreviation used subsequently.
7. Although the collaborations will be subject to a process of editing, **authors are encouraged to** delivering a first correction versions.

Sending the article to the editor of the magazine is made in the printed version along with the electronic version to the Directorate of the Research Institute of the Faculty

E-mail: industrial.data@industrial.unmsm.pe

CC: iifi@unmsm.edu.pe The author(s) is obliged to not send it simultaneously to other publications.

8. The Editorial Board submits to being reviewed by experts in the subject of the article and recommend changes and corrections you consider relevant. If the item does not meet the quality and originality required reporting to stakeholders.
9. The Editorial Board of the journal INDUSTRIAL DATA is not responsible for the content or the conclusions and recommendations that come (n) el (los) author (s) in their research work.
